

The Most Cost Effective Security Keypad and Home Controller For Your Home or Business

Centralized control of security system, video cameras, Z-Wave® enabled thermostats, lights, door locks and shades from the Tuxedo Touch controller or through any local Wi-Fi enabled devices.

Manage energy costs with customized scenes that can set back thermostats and turn lights on or off based upon specific events or time of day.

Large 7" touchscreen and most intuitive user interface makes operation simple.

Built-in web server allows user to control system locally from any Wi-Fi enabled device included iPad®, iPhone®, Android™, BlackBerry®, Tablet, PC, etc.

Offer the same user experience remotely, with Tuxedo Touch remote control options. Whether you want to arm/disarm, view live video, or control your Z-Wave enabled thermostats, lights, door locks or shades. Network configuration required for remote access.

Enhanced security with the ability to view up to four IP cameras right at the keypad.
